

Diving Medical Responder

October 17-19, 2017

Canton, GA

This course will provide training in the skills necessary to respond to a diving emergency. It is designed specifically for public safety dive teams and professional divers. It is the Dive Medical Technician course without chamber operations. Medical and non-medical dive team members as well as non-divers interested in public safety diving are encouraged to attend.

Topics Include: Physics and Physiology of Diving, Decompression Sickness, Cerebral Arterial Gas Embolism, Barotrauma, and more....

Skill Stations: Patient Assessment, Neurological Assessment, Airway Management, Chest Decompression, Trauma.

Skill stations and scenarios utilizing mannequins and each other. You will perform patient assessments, needle decompression, wound care and hemorrhage control with tourniquets and hemostatic gauze.
